Dear Customer,

Re: Harwin and Nicomatic – Datamate compatibility.

I can hereby confirm that Harwin Datamate and Nicomatic CMM series are fully intermateable and interchangeable for the following product ranges:

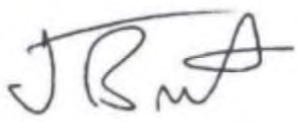
- Harwin Datamate L-Tek are mateable and drop-in replacements for Nicomatic CMM100 and 200 series. The two ranges are comparable in fit, form and function.
- Harwin Datamate J-Tek are mateable and drop-in replacements for Nicomatic CMM220 series. The two ranges are comparable in fit, form and function.
- Harwin Datamate Mix-Tek are mateable and drop-in replacements for Nicomatic CMM220 series with series 30 special contacts. The two ranges are comparable in fit, form and function.
- Harwin Datamate 3-Row J-Tek and Mix-Tek are mateable and drop-in replacements for Nicomatic CMM320 series with series 30 special contacts. The two ranges are comparable in fit, form and function.

Please note, Harwin do not recommend the use of Nicomatic contacts in Harwin housings, or vice-versa.

This statement is made with the understanding that Nicomatic are free to change the design of any of their products in the future. The design of these products is partially covered by British Standard BS9525-F0033 – any deviation by other manufacturers would render their product outside this standard.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,



John Brunt, MSc
