Dear Customer,

## Re: Harwin and McMurdo – Datamate compatibility.

I can hereby confirm that Harwin Datamate and McMurdo 200, 220 & 300 series are fully intermateable and interchangeable for the following product ranges:

- Harwin L-Tek Datamate are mateable and drop-in replacements for McMurdo 200 series. The two ranges are comparable in fit, form and function.
- Harwin J-Tek Datamate are mateable and drop-in replacements for McMurdo 220 series. The two ranges are comparable in fit, form and function.
- Harwin Mix-Tek Datamate are mateable and drop-in replacements for McMurdo 220 series with the special contacts that fit on 4mm pitch. The two ranges are comparable in fit, form and function.
- Harwin 3-Row J-Tek and Mix-Tek Datamate are mateable and drop-in replacements for McMurdo 300 series with (where applicable) the special contacts that fit on 4mm pitch. The two ranges are comparable in fit, form and function.

Please note, Harwin do not recommend the use of McMurdo contacts in Harwin moulds, or vice-versa.

This statement is made with the understanding that McMurdo are free to change the design of any of their products in the future. The design of these products are partially covered by British Standard BS9525-F0033 – any deviation by other manufacturers would render their product outside this standard.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,

Miss Wendy Jane Bourne, BEng  
Technical & Marketing Engineer
