C Band Antenna

Application:

Satellite communications system.

Background:

This equipment has many cables, and a long BOM requirement for connectors to various parts of the equipment. The customer wanted to stick with a consistent connection type for the different cable-to-board connections.

The Challenge:

With multiple cable requirements with outdoor system exposure, the customer needed a rugged connector system with multiple size options and temperature/humidity resilience.

Harwin Solution:

Datamate J-Tek 2-row and 3-row connectors use the same cabling and connection system across a wide range of connector sizes – all capable of meeting the customer's environmental concerns.
