High-Definition Thermal Imager

Application:

Infra-red vision system and range finder.

Background:

The customer required a high-reliability system capable of withstanding transport vibration and portable use in defense environments.

The Challenge:

As a portable or mounted imager, size and weight are important – but rugged performance and vibration resistance are also key aspects. Connectors need to be compact and high-reliability.

Harwin Solution:

A combination of Gecko-SL and Datamate J-Tek make board-to-cable connections inside the equipment, bringing high-rel with different current ratings.
