Video transmission from Satellite

Application:

Satellite TV from Geostationary Orbit.

Background:

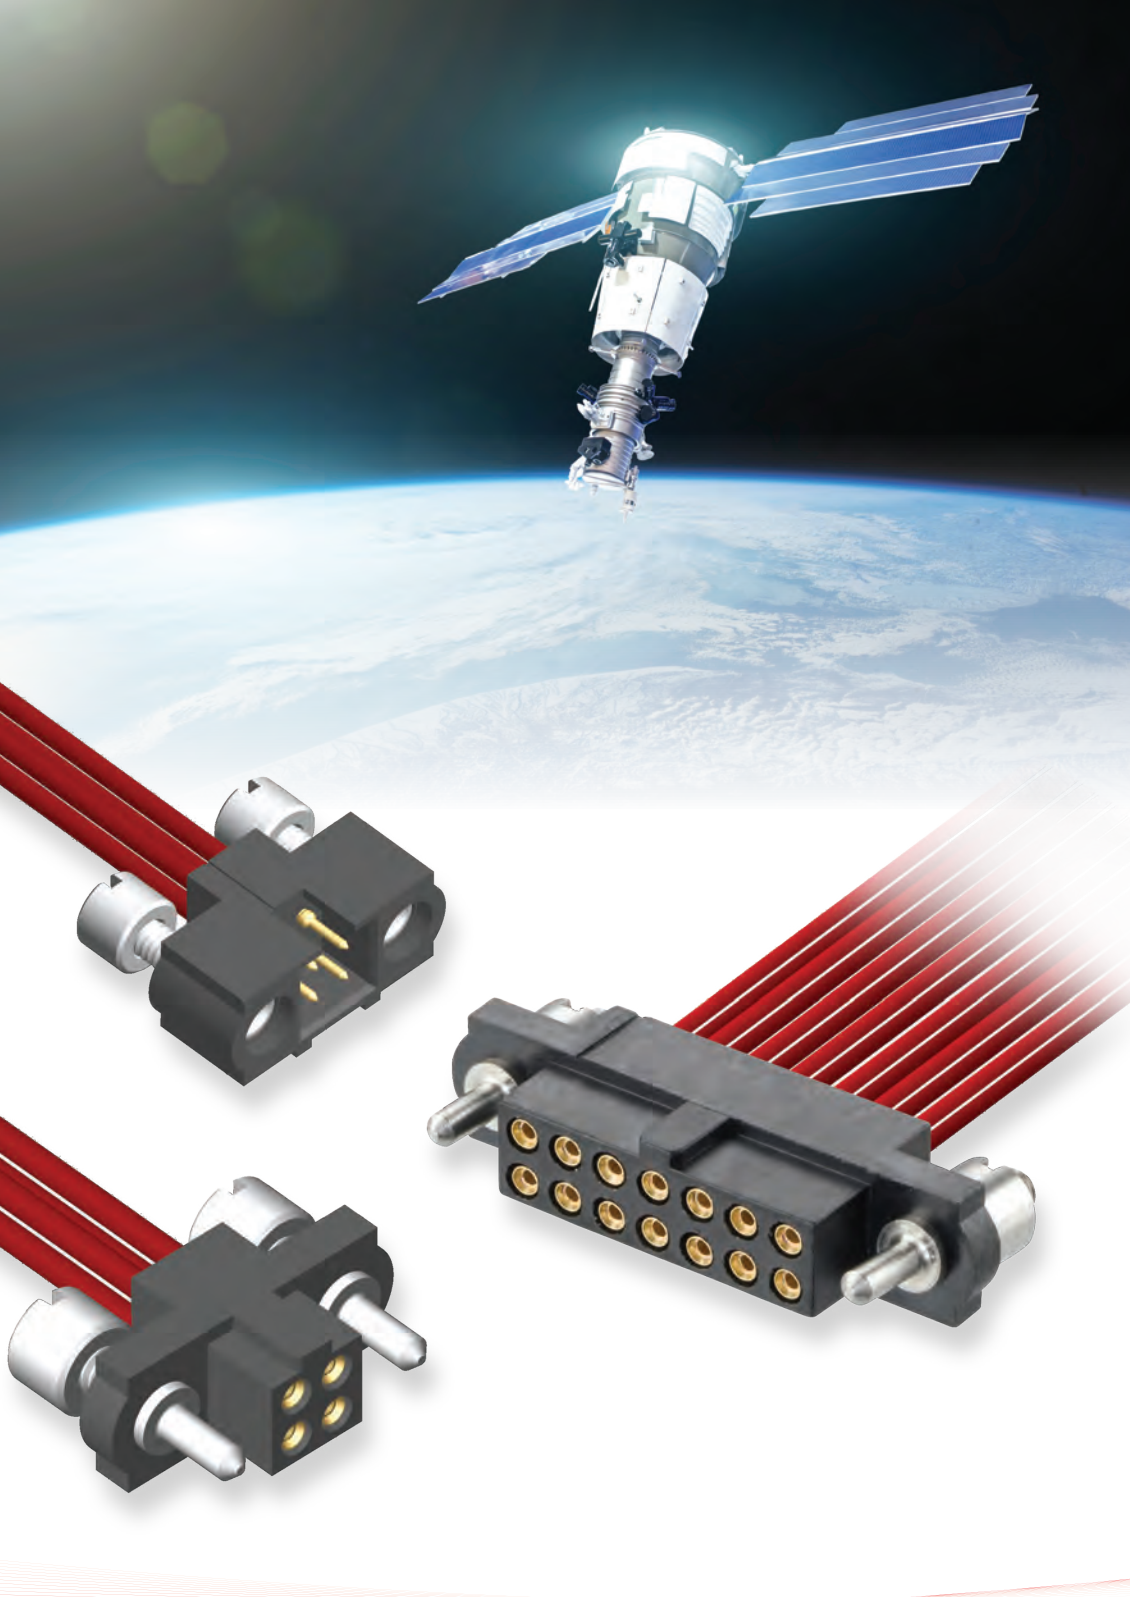

Customer manufactures enclosed server units for launch and operation in earth-orbit satellites. Two units are plugged together within the satellite body.

The Challenge:

Panel-to-panel connection rugged enough to survive launch and orbiting conditions, yet easy to blind-mate on assembly.

Harwin Solution:

Using Datamate J-Tek with a combination of female guide pins and male panel mount, both cable connections provide panel mounting with high-reliability performance.
