Dear Customer,

Re: Harwin and the REACH Directive (EC1907/2006).

I can hereby confirm that Harwin are aware of the EC Directive EC1907/2006, known as REACH (Registration, Evaluation, Authorisation and Restriction of Chemical substances).

To the best of our understanding, registration (or pre-registration) is required for companies that either produce or import into the EU any substance in volumes that exceed one tonne per substance per year. Harwin do not exceed this import amount, nor do we produce our own substances, and will therefore not be required to register.

Full Material Declarations (Material Composition data) are available to download for a number of Harwin products. To see if a FMD has already been produced, please search for the part number [on our website](#), and the FMD (Material Composition data) is available from the Product Page. Alternatively, search for the first few digits of the part number on our [Legislation Documentation page](#). If you are unable to find the FMD of the product you require, please contact ComplianceTeam@harwin.co.uk.

SVHC (Substances of Very High Concern) declaration.

To the best of our understanding, all active standard Harwin products (those listed in our catalogue or on our website, and not obsolete) and packaging, irrespective of Country of Origin of the final product or materials, do not contain any of the 197 substances included on the Candidate List of Substances of Very High Concern (SVHC list) as it stands updated 15th January 2019, **with the sole exception of Lead in certain products**. If used, Lead will be listed in a product's Full Material Declaration (Material Composition data). The current SVHC list can be found here:

<http://echa.europa.eu/candidate-list-table>

A summary of the list also follows on pages 3 to 9 of this document.

Annex XIV ("Authorisation List") is a subset of the SVHC list, which does not include Lead, and therefore are not contained in our products or materials. The current list can be found here:

<https://echa.europa.eu/authorisation-list>

Annex XVII ("Restriction List").

To the best of our understanding, all active standard Harwin products (those listed as not obsolete in our catalogue or on our website), irrespective of Country of Origin of the final product or materials, either:

- a) do not contain any of the 69 substances included on the Restriction List as it stands updated 20th December 2018, or

- b) the Conditions (as listed against each substance) are not relevant to our final products or materials.

The current list can be found here:

<https://echa.europa.eu/substances-restricted-under-reach>

A summary of the list also follows on pages 10 to 12 of this document.

If you have any further questions regarding this letter, please do not hesitate to contact me.

Yours faithfully,
