Dear Customer,

Re: Product Change Notification for Harwin product.

Please be advised that the following part number has undergone significant product change:

- Z50-020

This is the IDC crimp tool for Archer M50 IDC connectors. Investigation has resulted in a change to the tooling design on this product. We are improving the tool so that it works more effectively on the Female connectors – M50-330 series.

We have also developed a separate tool for the Male IDC connectors – M50-380 series. The part number for this tool is Z50-030, and it will be available soon through your normal Harwin Sales channels.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Change Team
